

December 17, 2024

Notice of Rate Change – January 1, 2025

Please be advised that the rate for sanitation truck disposals at the H.M. Bailey Water Pollution Control Plant will be increasing effective January 1, 2025.

Inside city loads will be charged at \$2.36 per cubic metre and \$3.54 per cubic metre for outside city loads. A copy of the approved Bylaw 14/2024 detailing water and sewer rates for the City of Yorkton is provided for your information. The table below represents the change to these rates on January 1, 2025.

	2024 Bylaw Rate (per m³)	2025 Bylaw Rate (per m³)
In City Septic Disposal	\$2.29	\$2.36
Outside City Septic Disposal	\$3.44	\$3.54

Monthly invoices will reflect the cubic metre rate according to the bylaw. Transactions record logs at the disposal facilities should always be recorded in cubic metres.

With the new system automation for load disposals, at this time, we are asking hauling companies to continue documentation of loads on the log forms.

Please remind all operators to fully complete the log forms for each delivered load.

This includes:

- your company name at the top of each new log form page,
- date and time of load disposal,
- load origin which is both the name and physical location (Yorkton street address or RM) where load was collected,
- description of the load content,
- volume of load in cubic metres and
- equipment operator initials.

If you require further information, please contact our office at 306-828-2470.
