**New Benches on Mayhew Pathway**

Three new benches have been installed on the Mayhew Avenue pathway courtesy of the Rotary Club of Yorkton.

“These benches are very important as part of the city’s pathway development program, and help us as we continue to expand the pathway system throughout the City,” said Mayor Bob Maloney. We greatly appreciate the Rotary Club’s support,” he said.

“The Rotary Club of Yorkton was established in May, 1921, and has a long tradition of giving back to the local, regional and international community,” said President Linda Quart

“These benches are just one more way our organization gives back to our community,” she said.

The red metal benches are mounted on 12 foot by 5 foot concrete pads and come with a concrete waste receptacle and lid on the side. Lighting, perhaps solar powered, is under consideration for the future, said the Mayor.

The value of the benches is \$11,100.
