Yorkton Parks TECH TIP

Private Tree Pruning Tips

- Mid February to mid May is a great time to prune trees while disease pathogens and insects are dormant.
- Prune your Dutch Elm trees now before the Dutch Elm pruning ban is in effect from April 1st to August 31st.
- Pruning helps remove dead and/or diseased branches of limbs. Removing dead branches helps eliminated unnecessary weight to the tree which may contribute to damage during a high wind.
- Prune so that the natural form of the tree is followed or restored.
