

## Yorkton Parks **TECH TIP**

### How to make an Outdoor Rink

- Pick a flat spot near an outdoor water source.
- Put the liner down when you're ready to fill and only when the forecast is consistently  $-8$  to  $-10^{\circ}\text{C}$ .
- Fill all at once. Don't fill in layers as it could damage your liner.
- Best ice surfaces need regular maintenance. Remove snow right after a snowstorm.
- Lay down a layer of hot water if possible. Unlike your initial fill, when resurfacing, fill in several thin layers.
- Grass won't be damaged if the liner is set up early enough.
- Drain your rink as soon as the ice melts in the spring.
- City outdoor rinks will be started when temperatures consistently drop below  $-8$  to  $-10^{\circ}\text{C}$ .
